
Partner with Others to Deliver Transportation Services

*Tangible Result Driver – Kevin Keith,
Chief Engineer*

To be an effective leader in transportation, MoDOT must work with agencies and branches of government, including state, county, private industry and municipalities to deliver a quality transportation system that meets the needs of everyone. A coordinated transportation system requires partnerships to ensure compatible decisions are made. Partnering builds trust and ensures quality results.

Partner With Others to Deliver Transportation Services

Number of dollars of discretionary funds allocated to Missouri

Result Driver: Kevin Keith, Chief Engineer

Measurement Driver: Todd Grosvenor, Finance Manager

Purpose of the Measure:

This measure shows the number of dollars of discretionary funds allocated to Missouri.

Measurement and Data Collection:

The federal government allocates discretionary funds to states for specific highway and multimodal projects. Multimodal projects include waterway, aviation and transit activities. These funds are distributed administratively for programs that do not have statutory distribution formulas. States compete for these funds, which are above the formula apportionments. Resource Management collects this information from the Federal Highway Administration, Federal Transit Administration and Federal Aviation Administration. Missouri's share of the total highway funds allocated nationwide over the last five years is 3.6 percent, which ranks seventh. The state of California received the largest share with 8.4 percent. Missouri's share of the total multimodal funds allocated nationwide over the last five years is 2.0 percent, which ranks 16th. The state of New York received the largest share with 11.8 percent. This is an annual measure.

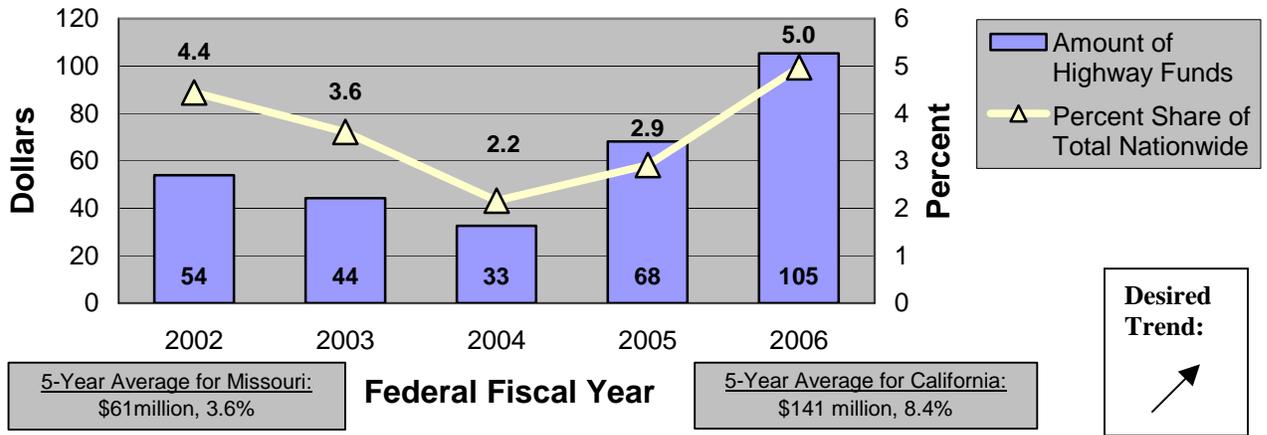

Improvement Status:

The number of dollars of discretionary funds allocated to Missouri for highway projects increased significantly in 2006. This was mainly attributable to an increase in the funds made available from the annual appropriations bill and an increase in the annual allocation percentages for the projects identified in the current highway act, SAFETEA-LU. The funds allocated to Missouri increased 54 percent from 2005 to 2006, while the funds allocated nationwide decreased by 10 percent. Our Congressional delegates were very successful in securing discretionary funds for highway projects in Missouri.

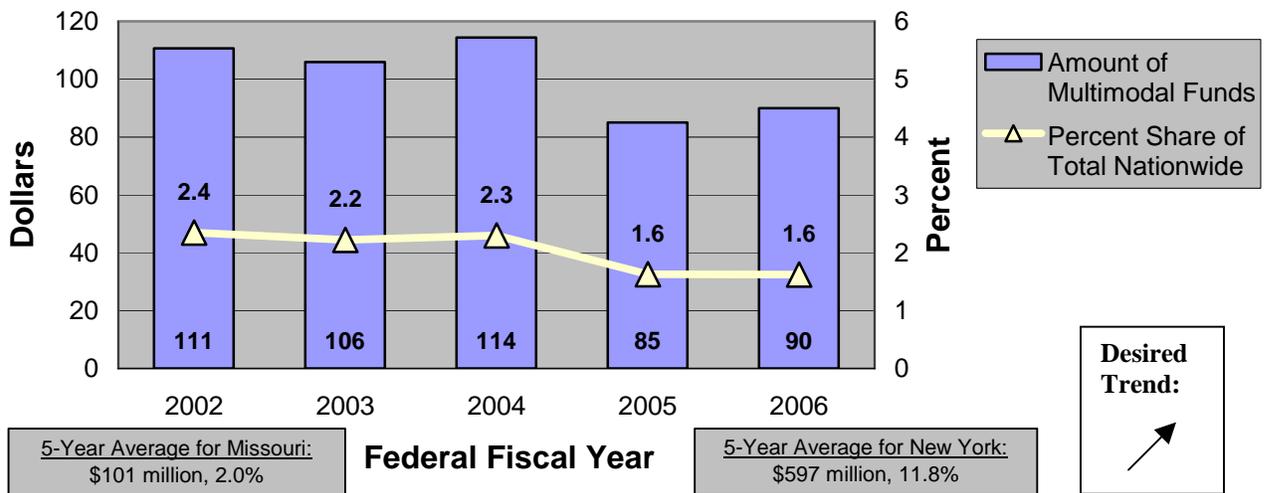

The number of dollars of discretionary funds allocated to Missouri for multimodal projects increased slightly in 2006. This was mainly attributable to an increase in transit funds. The funds allocated to Missouri increased 6 percent, which is the same increase as nationwide.

Governmental Relations along with senior management continue to work very closely with Missouri's Congressional delegates to identify specific transportation projects that are good candidates for discretionary funds.

Number of Dollars of Discretionary Funds Allocated to Missouri - Highways (in millions)

Number of Dollars of Discretionary Funds Allocated to Missouri - Multimodal (in millions)

Partner With Others to Deliver Transportation Services

Percent of earmarked dollars that represent MoDOT's high priority highway projects

Result Driver: Kevin Keith, Chief Engineer

Measurement Driver: Todd Grosvenor, Finance Manager

Purpose of the Measure:

This measure shows the percent of earmarked dollars that represent MoDOT's high priority highway projects.

Measurement and Data Collection:

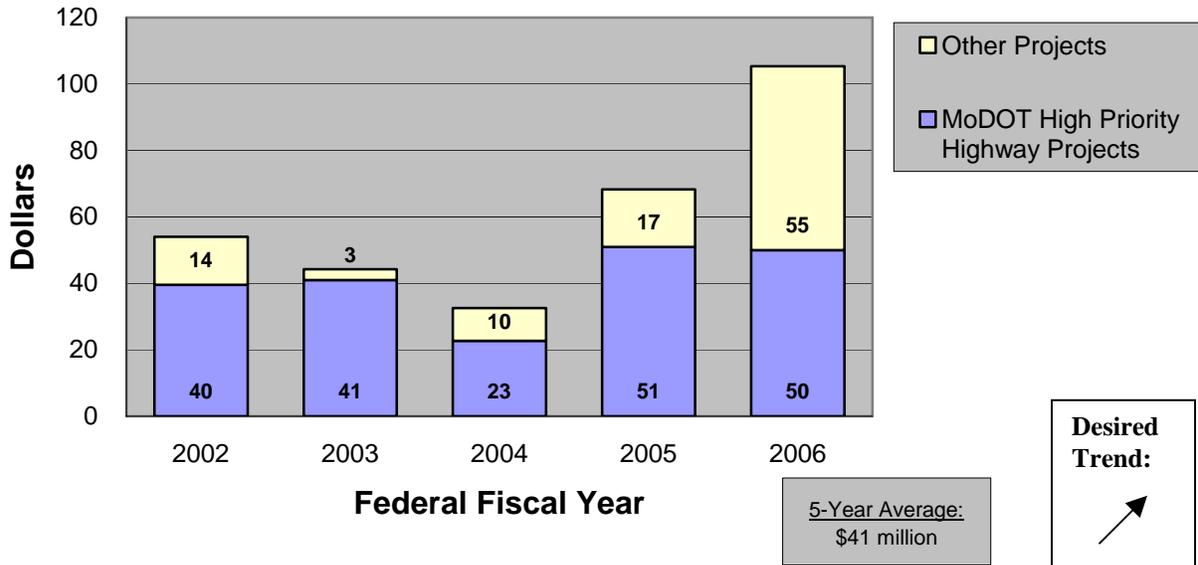

Earmarked dollars are federal funds allocated to states for specific highway projects. These funds are distributed administratively for programs that do not have statutory distribution formulas. States compete for these funds, which are above the formula apportionments. Resource Management collects this information from the Federal Highway Administration. MoDOT's high priority highway projects are identified in the Federal Priorities list that is prepared by Governmental Relations. This list is provided to Missouri's Congressional delegates. This is an annual measure.

Improvement Status:

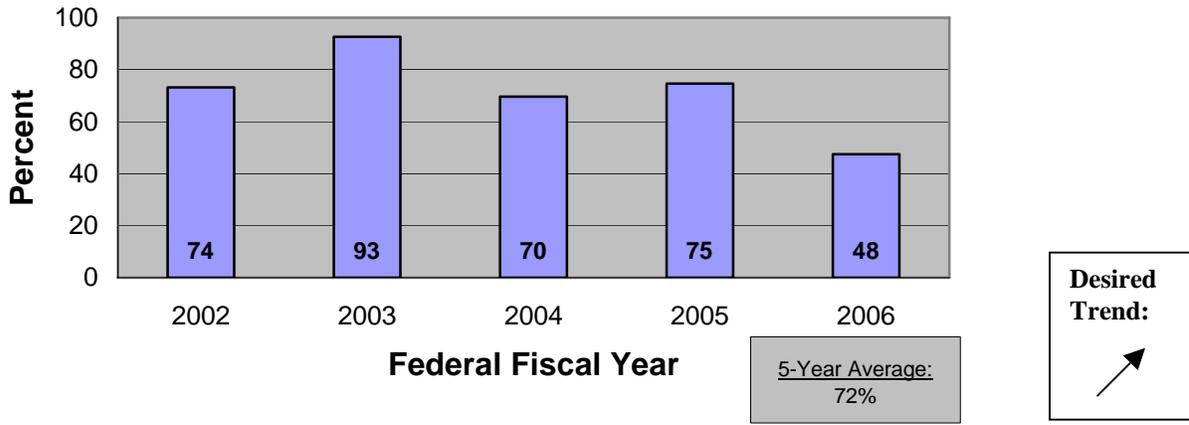

Missouri's earmarked dollars for specific highway projects increased significantly in 2006. This was mainly attributable to an increase in the funds made available from the annual appropriations bill and an increase in the annual allocation percentages for the projects identified in the current highway act, SAFETEA-LU. Our Congressional delegates were very successful in securing earmarked dollars for highway projects in Missouri. However, the percent of earmarked dollars that represent MoDOT's high priority highway projects decreased considerably. Many of the earmarked dollars were for projects not identified in our Federal Priorities list. Over the last five years, MoDOT's high priority highway projects received 72 percent of the earmarked dollars.

Governmental Relations along with senior management continue to work very closely with Missouri's Congressional delegates to identify MoDOT's high priority highway projects that are good candidates for earmarked dollars.

Number of Earmarked Dollars Representing MoDOT's High Priority Highway Projects (in millions)

Partner With Others to Deliver Transportation Services

Number of dollars generated through cost-sharing and other partnering agreements

Result Driver: Kevin Keith, Chief Engineer

Measurement Driver: Mark Mehmert, Partnership Development Manager

Purpose of the Measure:

This measure monitors the effectiveness of MoDOT's cost sharing and partnering programs. It shows the funds invested in highway construction by cities, counties, transportation corporations, and transportation development districts as a result of funds being made available for local construction by MoDOT.

Measurement and Data Collection:

This is an annual measure. New information will be available October 2007. The data comes from various sources, both inside and outside of MoDOT. The sources include transportation corporations, transportation development districts, MoDOT districts and programs with responsibility for monitoring partnering agreements and permits.

Agreements included in the last two years of this data set were compiled in the fiscal year in which the agreement was entered into or during which the permit was issued. In the data up to 2004, the dollars generated were compiled at the point projects were added to the STIP, and accounts for the large variance in 2004.

Improvement Status:

In 2006, two partnering agreements (Highways 67 and 36) were reached that accounted for \$103 million of the total shown. The U.S. Army Corps of Engineers partnered with MoDOT in the Highway 67 project. MoDOT also signed agreements with Madison County and the cities of Lebanon, Riverside, Branson, and Desloge.
