

Kevin L. Keith, Interim Director

SINGLE FEASIBLE SOURCE PURCHASE POSTING NOTICE

The Missouri Department of Transportation has determined that only one source can provide the products or services described below

Title: SFS 7-080905FR Rectifiers for Cathodically Protected Bridge Decks

Description: As part of MoDOT's maintenance of the state's bridges, MoDOT personnel or contractors maintain a select few Cathodically Protected (CP) reinforced concrete bridge decks in the St. Louis area. These CP systems are used on bridges which have concrete contaminated with road salts to the point that if the reinforcing steel was not electrically protected from corrosion the bridge decks would require continuous repair of potholes caused from the rebar in the deck rusting. The controller of the CP systems is called a rectifier, which converts 110 volts AC line power to DC voltage needed to run the cathodic system. Diversified Construction Inc. can supply and install the rectifiers as they have in the past on current highway construction projects. These rectifiers meet the needs of MoDOT and have the modifications necessary to work with the existing CP system. Purchase orders not to exceed \$25,000 annually, single or in the aggregate, are expected to be issued to Diversified Construction Inc.

Contract Period: Date of Award through August 31, 2009

Second Renewal of the Original Contract Period: September 30, 2010 through August 31, 2011

Renewal Options: Four (4) twelve month renewal periods, or any portion therein.
