

## **ROUTE U SHOULDER WIDENING AND RESURFACING PROJECT**

- On average 4800 vehicles travel this section of Route U each day
- The existing highway has two 10' wide lanes and 2' wide earth shoulders
- The proposed improvements will provide two 11' wide lanes and 4' wide paved shoulders
- The existing Route U pavement will be resurfaced
- The existing curve near Sand Run Road will be softened
- The segment of outer road that served as Route U prior to construction of the US 61 interchange will be resurfaced
- Some land will need to be acquired to provide these improvements
- This project is scheduled for construction during 2014
- The project is estimated to cost about \$2 million
